KEY FEATURES

- Universal for many cameras types.
 - Basler ace, Basler ace2, FLIR, IDSAVT-MAKRO, Opto-Engineering cameras COE, LUCID, JAI GO.
- Reduces working temperature up to 10 °C.
- Improves image quality by reducing thermal noise.
- Extends camera life and improves overall performance.
- Holder without heat sink can be used if there is only limited space available.

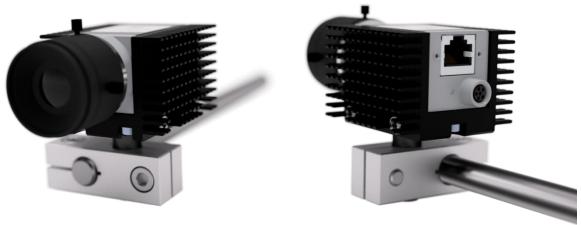

Fig. 1 – Universal heat sink with mounted camera Basler ace2

1 PRODUCT DESCRIPTION

The camera holder with heat sink consists of four aluminum parts, which are fastened together by screw connections. The heat sinks side panels have milled ribs to maximize the cooling surface. Thanks to oversize, the heat sink is also suitable for PoE cameras that are characterized by higher power dissipation. The surface finish of all parts is black matt anodized, which increases scratch resistance while improving cooling efficiency by radiating heat to the surrounding area.

Parameter	Value
Dimensions without mounting rod	53,6 x 39 x 51 mm
Mounting rod length x diameter	30 x 12 mm
Camera front dimensions	29 x 29 mm
Weight	107 g
Types of threads	M8, 1/4"

Tab. 1 – Heat sink parameters

ATEsystem s.r.o. Page 4 of 8

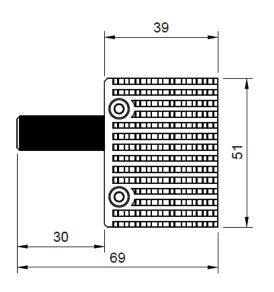

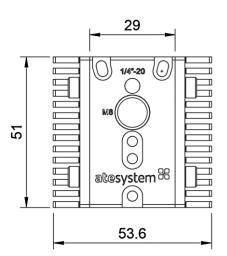

Universal camera heat sink for sugarcube cameras is designed to be easily used with the standard Balluff fastening system. For this purpose, 12 mm diameter mounting rod is used, which fits perfectly into the fasteners (The rod for the camera holder is not part of the package, it can be purchased as an accessory under order number 62025004).

3 COOLING EFFICIENCY

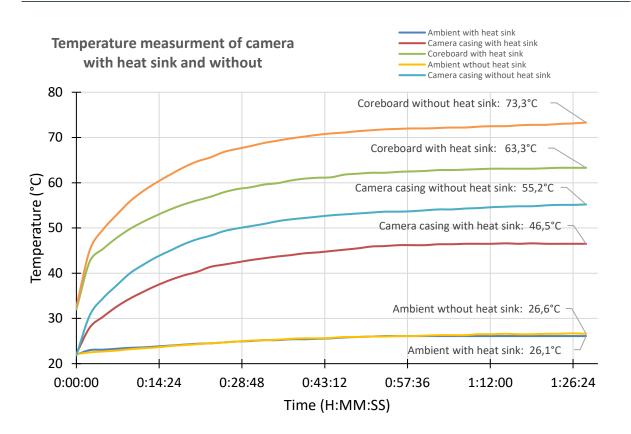

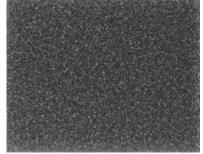

Fig. 2 – Temperature graph of a2A1920-51gcPRO

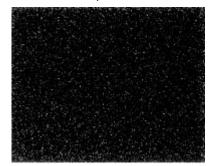

The graph in Fig. 2 shows the temperature rise in time and the operating temperature of the camera after 1,5 hour. Measurements were performed on cameras powered by 12V source with mounted objective. The ambient temperature during measurement was 25 °C. Temperature values was readed from the camera's internal sensor.

3.1 THERMAL NOISE EXAMPLES

Camera image with heat sink, camera temperature 62,3 °C

Used set: Camera Basler a2A1920-51gcPRO 50gm (CMOS), exposure time 10 s, maximum gain, after operating 1 hour at ambient temperature 25 °C.

4 PRODUCT OPTIONS

Order number Description		
62025003	Universal camera heat sink Package: 2x side heatsink, 1x holder, 4x M4x10, 3x M3x8	
62025001	Universal camera holder Package: 1x holder, 3x M3x8	no at the state of
62025004	Rod for holder M8 D12x40mm
